

# HD - Lithium

Lithium Iron Phosphate Battery

HD200

## 12.8V - 200Ah

**Beyond Batteries HD Range** - Our premium, LiFePO4 heated power solution with communication ports. Engineered for durability and high-use applications, HD ensures reliable, uninterrupted power and efficient charging in cold-weather environments when it matters most.

### Bluetooth Monitoring

Use Android & iOS devices to monitor power, state of charge & battery health.

### Communications

2 x communication ports to link Victron & Insyty via CANbus & RS485 for VE.Can.

### High Capacity

Compact & powerful, the HD200 delivers 2560Wh for high-discharge demand.

### Heater Function

The HD range is equipped with heating to enable charging in temperatures down to -10°C.

### Safety First

LiFePO4 - Safe lithium option. Advanced BMS for protection & longevity.

### Fast Charge & Discharge

Fast charge in 1 hour. Delivering a continuous 250A output with a 500A peak current.

### Cycle Life

Provides 6000 cycles at 80% depth of discharge. 4500 cycles at 100%.

### Applications

Ideal for use in security pods, monitoring equipment and temporary lighting.
